

DAILY MINDSET PRACTICES

DAILY MINDSET PRACTICES

- To start this business on the right foot, we need to master yourself
- Success is not found from a big lucky break, its found from consistent positive habits that compound into big results
- One of the most powerful habits you can build for success is envisioning and planning your future

DAILY MINDSET PRACTICES

- What were about to show you as well will help you take control over the direction of your life
- As a business owner you need to be a leader and this means leading your own life
- The best way to take control over your life is to be crystal clear on where it is you want to go and breaking down the journey into tangible steps

DAILY MINDSET PRACTICES

- What are the goals? What is the vision you have for yourself and your life?
- In order for you to lead yourself in the direction of success we have to define what that looks like
- What we are going to do in this lesson is break down easy exercises that you can practice on a daily basis to build a strong mindset and guide you through your journey

VISUALIZATION & LOA

DAILY MINDSET PRACTICES

- Visualization is the practice of envisioning the future you want to achieve
- The Law of Attraction (LOA) is the belief that you will attract what you think about
- The more time you spend thinking about your desires and what you want, the more likely you are to achieve them

DAILY MINDSET PRACTICES

- There is a great movie that breaks down the law of attraction which I require you to watch
- The link to the movie will be down below
- This movie is called “The Secret”
- Now just a fair warning, this movie is woowoo and is sometimes seen as controversial

DAILY MINDSET PRACTICES

- Watch the movie to have a full understanding of visualization and the law of attraction
- Basically how it works is this, when you give yourself 10-15 minutes daily to meditate on the future you want, you are going to be guided towards that future

DAILY MINDSET PRACTICES

- The reason the movie is controversial is because they make it seem religious or of higher power
- Though I do believe there's a reason the Law of Attraction works
- What happens is that when we think about what we want, our brain subconsciously recognizes anything that is related to that as important

DAILY MINDSET PRACTICES

- When you visualize what you want, you will begin to recognize opportunities in your day to day life that could bring you closer to that goal
- Your reticular activation system becomes active for all things that will lead you closer
- Now you could consider these opportunities as a “sign”, but the reality is they were there all along, you’re just now seeing it

DAILY MINDSET PRACTICES

- As you recognize these opportunities, you will be able to move closer to the vision that you established for yourself
- With each closer step another opportunity presents itself leading you closer and closer
- Even though the concept itself sounds woowoo, there is validation to the exercise

DAILY MINDSET PRACTICES

- To practice visualization, give yourself 10-15 minutes every day to think about 3 scenarios
- What do you want your end of life to look like
- What do you want your life in the next 10 years to look like
- What do you want your life in the next year to look like

DAILY MINDSET PRACTICES

- The reason why I like setting long term visions is because you allow yourself to think freely from what's realistic
- Your limiting beliefs of what's possible right now leave
- When you long ahead long term anything can happen, so you start to dream about what you truly want

DAILY MINDSET PRACTICES

- When you think about these scenarios ask yourself:
- What do you want your day to look like?
- Who do you want in your life?
- Where do you want to live? What kind of house?
- What will you do for work? How much money will you make?

DAILY MINDSET PRACTICES

- What kind of car will you drive?
- What achievements will you have accomplished?
- What story will you tell?
- What impact will you make?
- Think about every single detail of your life
- Every detail is important, because this is where you will begin to lead your life

DAILY MINDSET PRACTICES

- Once you understand where your destination is, you will begin to act in alignment with that vision
- If your vision is to be rich, you will start seeing opportunities and take action towards that vision
- If your vision is to have a happy relationship, you will start seeing opportunities and take action towards that vision

DAILY MINDSET PRACTICES

- Visualizing your desired future also puts you in an abundant mindset
- Starting your day with this exercise gets you thinking positively about the life you are building and gives you a purpose for the actions you are taking
- This will start your day in a place of abundance

DAILY MINDSET PRACTICES

- Visualization is not a magic secret, visualizing alone won't make things work
- But if you are an action taker, visualization helps you see the destination
- Your inner compass will then be able to navigate life making decisions that lead you closer to that vision

DAILY MINDSET PRACTICES

- Successful people make time to visualize the life they want
- Practice this exercise on a daily basis

GOAL SETTING

DAILY MINDSET PRACTICES

- Goal setting turns your vision into a strategy
- Your vision is the desired reality, goals are the steps you need to reach to get there
- Think of goals as milestones in your journey
- Setting goals turn your vision from “how do I get there” to “This is the clear path in front of me”

DAILY MINDSET PRACTICES

- Set goals after you visualize in the same journaling session
- I like to categorize my goals as business and personal
- Business goals include revenue, products, impact, and anything that has an effect on others
- Personal goals include: travel, relationship, and anything that is important to me specifically

DAILY MINDSET PRACTICES

- Now for each category you want to set your goals for the year, month, week, and day working backwards
- What business and personal goals do you want to accomplish this year?
- What business and personal goals do you want to accomplish this month?

DAILY MINDSET PRACTICES

- What business and personal goals do you want to accomplish this week?
- And what business and personal goals do you want to accomplish today?
- Working backwards will allow you to plan out the steps you need to take to build up to your big year goals

DAILY MINDSET PRACTICES

- When you consistently hit your daily goals, you will hit your weekly goals
- When you consistently hit your weekly goals you will hit your monthly goals
- When you consistently hit your monthly goals you will hit your yearly goals
- When you consistently hit your yearly goals you will achieve your vision

DAILY MINDSET PRACTICES

- Setting yearly, monthly, weekly, and daily goals helps your inner compass stay on track with your vision
- Even if you don't achieve all the goals on the list, you are guiding yourself in the right direction and that's what matters most

DAILY MINDSET PRACTICES

- Writing down your goals needs to be a repeated practice as well
- Writing it one time and hanging it on the wall wont cut it
- It needs to be written down fresh every morning to keep it on top of mind

ACTION STEPS

DAILY MINDSET PRACTICES

- Action steps are the tasks you are going to do in that day
- These are similar to your goals, but they are broken down into processes instead of results
- A goal might be to book 1-3 calls, where an action step is to send 20 outbound messages

DAILY MINDSET PRACTICES

- For each goal you have for the day write down the action step you plan to take to achieve that goal
- At the end of the day whether you achieved the goal or not doesn't matter, what really matters is what actions you took to get you closer to the goal

DAILY MINDSET PRACTICES

- Your goals should be your guide through life
- Your action steps should be what you focus on to get you to your goal
- When you break it down to the smallest step like an action step and focus on that on a daily basis, you will build up the momentum over time in the direction of your vision to achieve it over time

PRACTICE GRADITUTE

DAILY MINDSET PRACTICES

- Practicing gratitude is just as essential to setting goals
- Except the purpose of practicing gratitude is to ground you in your life as you are being led by ambition
- It is very easy to get overwhelmed, disappointed, and discouraged when constantly chasing our goals

DAILY MINDSET PRACTICES

- Practicing gratitude will help you stay present to the life that you currently have and enjoy what is around you right now
- Practice gratitude at the end of the day as you are winding down
- Its very easy to let your dreams and ambitions keep you up at night

DAILY MINDSET PRACTICES

- Practicing gratitude at the end of the day will allow you to leave your work behind you and enjoy present time
- To do this journal something you're grateful for in life, something you're grateful for from that day, and something you're looking forward to the next day

DAILY MINDSET PRACTICES

- This will help you shift your mindset around your day to a positive note no matter what happened
- Whats important about this exercise is truly feeling gratitude for the things you listed
- Take a moment to sit and think about what your grateful for

DAILY MINDSET PRACTICES

- These exercises are meant to help guide you on your path in life
- Your inner compass will be able to navigate your journey so long as you take leadership over where you are going
- Practice this daily to get your mind in the right place before starting work

DAILY MINDSET PRACTICES

- With this exercise, more is not better
- Consistency over time is where you will see the most results

DAILY MINDSET PRACTICES

- Lesson complete
