

CLIENT ONBOARDING

CLIENT ONBOARDING

- Client onboarding is the process of getting your client into the program and takes place during and after the sales call
- Trainers get overwhelmed by not having a clear step by step process of onboarding a client
- After the sale they don't follow a clear process of bringing new clients in

CLIENT ONBOARDING

- Not having a clear onboarding process for your clients may also lead to buyers remorse
- Buyers remorse is the instant regret someone feels when making a purchase if their expectations are not met
- This happens often when you end a sales call and your client realizes they don't know what the next steps are

CLIENT ONBOARDING

- When you process payment and hang up the phone and your client has no next steps, or materials to work through they might think “was this a mistake?”
- Instead, we want to give them clear steps on what to do next, that way you can keep building momentum and excitement

CLIENT ONBOARDING

- This also makes it extremely simple for you to bring on new clients efficiently
- This way it doesn't take you hours to onboard a new client, but you can do it in a matter of a few minutes and a couple clicks

CLIENT ONBOARDING

- What we're going to do in this lesson is show you what onboarding materials you need, how to build them, and how to set up a step by step process for onboarding

MATERIALS NEEDED

CLIENT ONBOARDING

- What we are going to provide for you are examples
- You will be required to write and create your own materials here; the reason being is your business will be unique to you so your branding, wording, and language must come from you

Contract

Payment

Welcome Email

Assessment Form *

CLIENT ONBOARDING

- Contract (on sales call)
- Payment (on sales call)
- Welcome Email
- Assessment Form (either a separate form for them to fill out or have built into client management system)

CLIENT ONBOARDING

- During the sales call, you will get your contract signed and then payment. The contract has your refund, termination policy and other important things for your protection therefore its important this is handled accordingly.
- The contract is provided for you, you just need to edit it. There is a separate module going into detail on how to utilize this material accordingly.

CLIENT ONBOARDING

- The Welcome Email is the first item your client will receive once they have joined your program
- This email will first welcome your client into the program and go over next steps
- Remember that your client might feel overwhelmed or nervous to get started so this will help them feel excited

CLIENT ONBOARDING

- **The steps your welcome email should outline is this:**
- 1) Welcome to (your program)
- 2) Log into Client Management System (and what it is)
- 3) Complete assessment form (either in client management system or otherwise)
- 4) review welcome packet (once you have one)
- 5) join community (once you have one)

CLIENT ONBOARDING

- The Welcome Email should clearly state step by step for your client what they need to do and how
- The goal here for this is so that you don't have to take the time to explain this process to each and every new client
- Onboarding becomes automated
- Here's an example of a Welcome Email

CLIENT ONBOARDING

- Feel free to make a copy and change the wording to match your own
- Once your welcome email is written, it's time to build your assessment

CLIENT ONBOARDING

- For your assessment you can either create a custom assessment inside the Client Management System Or you can create your own custom form via Google Forms or Typeform
- If you are using a client management system that has one already built in, it will be easier for both you and the client to have it within the management system rather than 2 separate ones.

CLIENT ONBOARDING

- The assessment should only ask the necessary questions you need in order to build your clients program
- Remember to reduce friction, keep your assessment as short as possible
- Think about the necessary questions YOU need to know in order to build your clients program

CLIENT ONBOARDING

- If you choose to build your assessment into the Client Management System, refer to that lesson for the tutorial on how to make that an automated step (In trainerize: settings → consultation form)
- If you choose to build it outside of the Client Management System, make sure to include the link to the form in the Welcome Email

CLIENT ONBOARDING

- Here's an example of an Assessment Form

CLIENT ONBOARDING

- A Welcome Packet is going to require a little more time to build out and doesn't have to be ready for the very first client you have
- In the beginning you can onboard a client walkthrough over the phone
- This will be the fastest way to get a client onboarded at first and you will be able to get feedback on questions your clients have

CLIENT ONBOARDING

- But over time you will realize that you are repeating the same information over and over again
- At this point, your welcome packet will serve as a walkthrough to answer the common predictable questions your clients will have and go over basic instructions.

CLIENT ONBOARDING

- To start this, make a list of all the things your client must be brought up to speed on in order to start their program
- What do they need? And what do they need to know?
- As you gain more clientele and gain more feedback, you can add to you welcome packet

CLIENT ONBOARDING

- For example: Are they going to need to buy a food scale? Are they going to need to learn how to use myfitnesspal? Do they need to know how to take check in photos? Do they need to know your hours of communication? Where will they be communicating with you?
- Try to predict as many essential questions your client will need the answer to

CLIENT ONBOARDING

- Once you have the questions, write a thorough response detailing the answer for your client
- You can do this on a simple word doc, it doesn't need to be pretty right away, you just need the content
- I recommend starting small, with a few questions and answers and adding more as you grow

CLIENT ONBOARDING

- Once you have a solid outline of a welcome packet, you can either buy an ebook template off of etsy and edit your contents into an ebook on canva
- Or you can hire a freelance graphic designer on fiverr to do it for you
- Either are solid options

CLIENT ONBOARDING

- Here's an example of what a Welcome Packet can look like
- Again, you will need to build your own. Please respect the intellectual property of other coaches
- Collaborating and sharing ideas is encouraged
- Copying and stealing is not

CLIENT ONBOARDING

- Once you have your welcome packet built you can add it to a google drive folder, a drop box, or send it as an automated message in your Client Management System

YOUR FIRST SOP

CLIENT ONBOARDING

- An SOP stands for a Standard Operating Procedure
- What this is is a series of steps designed to perform a tasks
- SOP's can be built for many tasks in your business: Dm outreach, sales, onboarding, payment etc

CLIENT ONBOARDING

- Building a scalable business comes down to turning each task into an SOP
- Your client onboarding SOP is going to look like this:
 - Step 1: Getting contract signed & payment
 - Step 2: Add client to Client Management System
 - Step 3: Send Welcome Email
 - Step 4: Confirm client completed assessment, and joined group/communication channels
 - Step 5: Begin building client program
 - Step 6: Answer any remaining questions

CLIENT ONBOARDING

- Now when you are still on your sales call with your client, you want to walk them through the next steps so that they do not get buyers remorse
- Here you will explain each step your client must take once they are off the call
- Onboard them as soon as possible once off the call

CLIENT ONBOARDING

- After your clients complete all of those steps you have successfully onboarded your client
- This will turn into a simple rinse and repeat process

TROUBLE SHOOTING

CLIENT ONBOARDING

- Trouble shooting in onboarding is simple, the biggest challenge you're going to run into is questions from your client
- Here you can offer a support call or simply ask if your client has any questions left before getting started

CLIENT ONBOARDING

- If your client has questions, it's likely that another client after them will have a similar question
- You can take their question and add your answer into the Welcome Packet so that the answer can be found for the next onboarded client
- After some time, your packet will be so extensive that you won't need to answer any more questions.

CLIENT ONBOARDING
