

SHILOH & WILLIAM

Weekly Raw + Whole Food Shopping List

Week of May 10, 2026 | Bonita Springs, FL

BOTH — combined qty (William + Shiloh)

SHILOH ONLY — not doubled

WILLIAM ONLY

ROTATE — pick one

WHAT GOES IN YOUR CART — EXACT QUANTITIES

This is the only section you need at the store. Scroll down for the full detail on why each item is included. Items marked ROTATE mean you pick **one option from that group per week** — not all of them. Organ meats are explained in the rotation note below Shiloh's cart.

SHILOH'S CART (raw diet, 95 lb GSD, ~17.5 lbs food/week)

Item	Qty	Frequency	Notes
■ EVERY WEEK			Buy these every single week — no rotation
Chicken backs (raw bone)	2–3 lbs	Every week	Main raw bone source. Soft, digestible, excellent calcium.
Chicken thighs (bone-in, skin-on)	3–4 lbs	Every week	Primary muscle meat. High fat for energy. Raw.
Beef liver	0.5 lb	Every week	Staple organ. DO NOT exceed 0.5–0.75 lb/week. See organ note below.
Green tripe (raw, unbleached)	1 lb	Every week	NOT counted in the organ cap. Buy every week regardless of other organs.
Sardines or mackerel (raw/frozen)	0.75–1 lb	Every week	Omega-3 source. Raw or thawed-from-frozen. Canned in water (no salt) also fine.
Eggs (whole, raw)	6–8 eggs	Every week	Feed 2 raw eggs 4x/week. Crack over food — yolk + white.
Chicken necks (raw bone)	1 lb	Every week	Secondary bone source. Supervise if Shiloh gulps without chewing.
■ ROTATE PROTEIN — pick ONE of these per week			Alternate week to week for nutritional variety
Option A: Ground beef 80/20	2–3 lbs	~2 of 4 weeks	Alternate main protein. Higher fat. Raw.
Option B: Pork shoulder (boneless)	2–3 lbs	~1 of 4 weeks	Alternate protein. Good fat-to-protein ratio. Raw.
Option C: Beef heart	1–1.5 lbs	~1 of 4 weeks	Classified as muscle meat (not organ — no cap). High CoQ10. Raw.
■ ROTATE ORGAN — pick ONE to pair with liver this week			Liver is always bought. One of these is added to it. NOT all three.
Option A: Beef or pork kidney	0.25 lb	3 of 4 weeks	Most common pairing. Liver + Kidney = standard week.
Option B: Beef spleen	0.25 lb	1 of 4 weeks	Swap in once a month instead of kidney. Higher iron. If unavailable, use kidney.
■ OCCASIONAL — add when available			
Pork ribs (raw, single rib)	1–1.5 lbs	1–2x/month	Recreational chew for jaw exercise and dental health. Raw only — never cooked.

Item	Qty	Frequency	Notes
Duck necks (if Asian market has them)	0.5–1 lb	When available	Higher meat-to-bone ratio than chicken necks. Check Asian market on Bonita Beach Rd.

ORGAN MEAT RULE — read this once: The table above lists Shiloh's organ options in two layers. (1) **Liver is always in your cart** — 0.5 lb every week, no exceptions. (2) **Pick ONE organ to pair with it** — kidney 3 weeks out of 4, spleen the 4th week. Do NOT buy liver + kidney + spleen all in the same week. Your weekly secreting organ total should be **~0.75 lb** (liver + one rotation organ). The 1.75 lb maximum in the detail section is the absolute cap — you should be well under it. (3) **Green tripe does NOT count toward the organ cap** — it is classified separately as a digestive supplement. Buy 1 lb every week on top of everything else.

WILLIAM'S CART (carnivore, 175 lb, ~14.5 lbs meat/week)

Macro targets: 262g protein/day (212g food + 50g whey), 161g fat/day, ~73g carbs/day. Rotate proteins week to week — same as Shiloh. Buying all options every week is fine but not required if you're tight on budget; focus on the EVERY WEEK items first.

Item	Qty	Frequency	Notes
■ EVERY WEEK			Buy these every single week
Grass-fed butter (Kerrygold)	1–2 lbs	Every week	Cook ALL meat in butter. Add to eggs, vegetables. Core fat source.
Eggs (large)	14–18 eggs	Every week	2–3 eggs/day. High-fat yolks are essential for the fat macro. Cook in butter.
Chicken thighs (bone-in, skin-on)	3–4 lbs	Every week	Shared with Shiloh — buy combined 6–8 lbs, split at home. William cooks his.
Ground beef 80/20	5–6 lbs	Every week	Primary protein. Higher fat 80/20 supports fat macro. Cook in cast iron or broil.
Avocado	4–5	Every week	~21g fat each. 1/day with a meal. NEVER give to Shiloh — toxic to dogs.
Bacon (uncured, no-sugar-added)	1 lb	Every week	High fat, good protein. Check label — no sugar added, uncured preferred.
Spinach (fresh or frozen)	1 lb	Every week	Low carb (~1g net/cup). Sauté in butter or eat raw. Iron and folate.
Blueberries (fresh or frozen)	1 pint	Every week	1/3 cup post-workout only — 9g net carbs per 1/2 cup. Antioxidants.
■ ROTATE PROTEIN — add ONE of these each week			Alternate for variety and different fat profiles
Option A: Ribeye or NY strip steak	2–3 lbs	~2 of 4 weeks	Highest-fat premium cut. Grill, reverse sear, or cast iron. Salt + butter only.
Option B: Pork belly	1.5–2 lbs	~1 of 4 weeks	Highest fat-to-protein ratio available. Roast with crispy skin.
Option C: Beef heart	0.5–1 lb	~1 of 4 weeks	Muscle meat. High CoQ10 and taurine. Sauté in butter — tastes like lean steak.
■ RESTOCK AS NEEDED — check before shopping			
Heavy cream (full fat)	1 pint	~Weekly	Add to coffee (replaces milk), use in pan sauces. ~5g fat per tbsp.
Hard cheese (cheddar, gouda, or parmesan)	0.5 lb	~Weekly	Near-zero carbs. Use as snack or topping. Avoid processed cheese slices.

Item	Qty	Frequency	Notes
Beef tallow (rendered) or suet	1 jar	Monthly	High-heat cooking. Ask Jimmy P's Butcher for suet (often free or cheap to render).
Body Tech Whey Isolate	—	Restock	2 scoops/day = 50g protein. Take post-workout within 30 min.
Electrolytes (LMNT or Redmond Re-Lyte)	—	Restock	Non-negotiable on carnivore. Depleted sodium drags potassium and magnesium with it.

Protein rotation (both of you): Week A: Chicken thighs + Ground beef. Week B: Ground beef + Pork shoulder. Week C: Ribeye/steak + Chicken. Week D: Mixed (clear the freezer). This prevents both you and Shiloh from eating the same protein daily and improves nutritional variety.

■ **KEEP SEPARATE:** Avocado, garlic, onion, and bacon are for William only. All are toxic to dogs. Keep prep surfaces separate from Shiloh's raw food.

1. WILLIAM'S DAILY MACRO TARGETS

Note on your 70/20/10 split: At ~2,900 cal/day (your estimated TDEE), 70% protein = ~510g/day — physiologically extreme and beyond what muscle can absorb. The targets below use **1.5g protein per pound of bodyweight** (aggressive but well-supported for intense training). Fat is raised to ~50% of calories, which is standard on carnivore for satiety and hormone support.

~2,900	~262g	~161g	~73g	+50g	~2.1 lbs
cal/day	protein/day	fat/day	carbs/day	whey supplement	meat/day from food

2. ORGAN MEATS — DETAIL & ROTATION RULES

SHILOH ONLY — quantities below are Shiloh's only

The cart checklist on page 1 tells you what to buy. This section explains why and what each organ does so you understand the system.

Organ	Weekly Qty	Status	Frequency	Why / What It Does
Beef liver	0.5 lb	STAPLE (always buy)	Every week	Richest source of vitamin A, B12, iron, copper. Do not exceed 0.5–0.75 lb/week — excess vitamin A is toxic at high doses. Feed 2x/week, not daily.
Green tripe (raw, unbleached)	1 lb	STAPLE (always buy)	Every week	NOT a secreting organ — does NOT count toward the organ cap. Highest-value item in the raw diet. Natural probiotics, digestive enzymes, ideal Ca:P ratio. Feed 3–4x/week. Pre-portion and freeze in 1-lb bags.
Beef or pork kidney	0.25 lb	ROTATE A (most weeks)	3 of 4 weeks	Standard pairing with liver. Rich in B vitamins and selenium. Feed 1–2x/week. This is your default second organ every week unless you swap in spleen.
Beef spleen	0.25 lb	ROTATE B (monthly)	1 of 4 weeks	Swap in place of kidney once per month. High in iron and digestive enzymes. If unavailable at the market, just use kidney that week.

Weekly organ total target: ~0.75 lb (0.5 lb liver + 0.25 lb kidney or spleen). **Maximum cap: 1.75 lbs** — the cap exists as a ceiling, not a target. You are not trying to hit 1.75 lbs; you're trying to stay well under it. Green tripe (1 lb) sits outside this calculation entirely.

3. RAW MEATY BONES

SHILOH ONLY — never cooked; not for William

Target 15–20% of Shiloh's weekly diet as raw meaty bones (~2.5–3.5 lbs/week). All bones must remain raw — cooked bones splinter and are dangerous.

Bone Item	Shiloh's Qty/Wk	Notes
Chicken backs	2–3 lbs	Soft, fully digestible. Safe for large breeds. Feed 3x/week as part of a meal.
Chicken necks	1 lb	Good calcium source. Supervise — some dogs swallow without chewing.
Duck necks (if available)	0.5–1 lb	Higher meat-to-bone ratio. Check Asian Market on Bonita Beach Rd first.
Pork ribs (raw, single rib)	1–1.5 lbs	Recreational chew — feed 1–2x/week. Raw only. Never cooked pork ribs.

4. FAT SOURCES — William's Carnivore Priority

WILLIAM ONLY — these support his 50% fat macro target (~161g fat/day)

Item	Qty/Week	Notes
Grass-fed butter (Kerrygold)	1–2 lbs (4–8 sticks)	Cook all meat in butter. Add to eggs. High in fat-soluble vitamins A, D, E, K2. Kerrygold is widely available at Publix and Costco.
Beef tallow or suet (rendered)	1 jar	High-heat cooking. Buy rendered tallow or render suet from Jimmy P's (often free or cheap). Render in slow cooker — makes a month's supply.
Heavy cream (full fat)	1 pint	Add to coffee instead of milk. Use in pan sauces. ~5g fat per tablespoon, 0.4g carbs.
Avocado	4–6	~21g mono-unsaturated fat per avocado. Eat 1/day with a meal. NEVER give to Shiloh — persin is toxic to dogs.
Hard cheese (cheddar, gouda, parmesan)	0.5–1 lb	High fat, near-zero carbs. Snack or topping. Choose aged hard cheese — avoid processed slices.

5. VEGETABLES & LOW-CARB PRODUCE

BOTH — buy once, split between both (Shiloh puréed, William cooked/raw)

William's ~73g carb target comes from vegetables only — no grains, no starches. Shiloh needs vegetables for fiber and micronutrients — puree or steam all of his. Rice, sweet potato, and banana have been removed (too starchy for carnivore).

Item	Combined Qty	Notes
Spinach (fresh or frozen)	2 lbs	William: raw in salad or sauté in butter (~1g net carbs/cup). Shiloh: blend raw or lightly steam. Iron and folate for both.
Kale or collard greens	1 lb	William: sauté in butter. Shiloh: steam then blend. ~3g net carbs/cup cooked.
Zucchini	2 medium	Very low carb (~2g net/cup). William: grill or sauté. Shiloh: steam and cube.
Broccoli (florets)	0.5 lb	Limit Shiloh to under 10% of his vegetable portion (isothiocyanates). William: sauté in butter, keep portion small to stay low carb.
Blueberries (fresh or frozen)	1 pint	William: 1/3 cup post-workout only. Shiloh: 2–3 tbsp per meal. Best low-carb fruit option for both.

6. SUPPLEMENTS & ADDITIONS

Each item labeled individually.

Item	Applies To	Qty	Notes
Body Tech Whey Isolate	William	Restock as needed	2 scoops/day = 50g protein. Fast-absorbing — take post-workout within 30 min.
Fish oil (wild salmon oil)	Both	1 bottle	Shiloh: 1 tsp/day. William: continue current routine. One bottle covers both.
Coconut oil (unrefined)	Shiloh only	Small jar	1 tsp 3x/week. Coat health, anti-inflammatory. William gets fat from butter/tallow.
Kelp powder or dulse flakes	Both	1 small bag	Natural iodine. Shiloh: ¼ tsp/day. William: use as replacement for iodine supplement.

Item	Applies To	Qty	Notes
Apple cider vinegar (raw, unfiltered)	Shiloh only	1 bottle	1 tsp in water bowl 3x/week. Gut health and joint support.
Turmeric + black pepper	Both	On hand	Shiloh: pinch 3x/week with black pepper. William: add to cooking daily.
Vitamin E (400 IU, mixed tocopherols)	Shiloh only	1 bottle	1 capsule per week pierced into food. Required on high-fat raw diets.
Probiotics or plain kefir	Shiloh only	1 tub	1–2 tbsp plain kefir 4x/week. Supports gut microbiome on raw diet.
Creatine monohydrate (optional)	William only	1 bag	5g/day. Supports ATP regeneration during intense lifting. Take with post-workout shake.
Electrolytes (LMNT, Redmond Re-Lyte, or sea salt)	William only	Restock	Non-negotiable on carnivore. Low-carb diets deplete sodium → drags K+ and Mg2+ with it. Salt food aggressively. Magnesium glycinate 300–400mg before bed also beneficial.

7. WHERE TO SHOP — Markets Near Bonita Springs

Markets near 10660 Founders Way, Bonita Springs FL 34135. Ethnic markets stock the harder-to-find items at a fraction of mainstream prices.

Market	Address	Hours	Best For
Asian Market (Bonita Springs)	10430 Bonita Beach Rd SE Bonita Springs, FL 34135 ~1.5 miles 📍 (239) 948-0398	Call ahead	Whole fish (sardines, mackerel), duck necks, chicken feet, pork offcuts, kelp/seaweed.
Mexican Star Grocery & Food	10430 Bonita Beach Rd SE Bonita Springs, FL 34135 ~1.5 miles 📍 (239) 221-7985	Daily 9am–10pm	Tripe (menudo), liver (hígado), kidney (riñones), heart (corazón), pork organs. Use Spanish terms for best selection.
Mi Mercado Foods	11375 Tamiami Trl E Naples, FL 34113 ~12 miles 📍 (239) 384-9244	Mon–Sat 6am–9pm	Full organ selection, whole poultry, bulk pork. Worth the drive when local is out of stock.
Jimmy P's Butcher Shop	Naples & Bonita Springs (call for location)	Call	Premium fatty cuts for William (ribeye, bulk pork belly), suet for rendering tallow.
Publix / Costco (backup)	Multiple Bonita Springs locations	Standard hours	Costco: bulk ground beef (10+ lbs), chicken thighs, 3 dozen eggs, Kerrygold butter, frozen sardines.

Weekly run (2 stops, same plaza): Mexican Star for organs + tripe, then Publix/Costco for bulk proteins, eggs, butter, avocados. **Spanish terms at Latin markets:** hígado (liver), riñones (kidney), corazón (heart), menudo (tripe), patas (feet).

Prepared by Panacea (Marceau Solutions AI) | May 10, 2026 | BARF/Prey Model for 95 lb adult GSD. Transition raw feeding gradually over 2–3 weeks, consult your vet. William's targets based on 1.5g protein/lb at ~2,900 cal/day TDEE. Adjust weekly based on energy and performance.
